

About SkillSoft Live Learning

SkillSoft Live Learning scales the advantages of instructor-led training with the efficiencies of the Internet into a seamlessly-blended learning environment students can't get anywhere else. Live, online classes bring world-class expert instructors to your desktop or laptop where they deliver an unparalleled overall learning experience.

Available via a calendar of scheduled events and on-demand recorded sessions, SkillSoft's Live Learning classes deliver the ultimate classroom experience, including better retention, reduced time in training, and decreased training costs.

For more information, contact one of our Live Learning consultants at isr@skillsoft.com or call 1-866-757-3177.

SkillSoft Live Learning-
Experience the Difference

Help your IT staff do more.

Chances are you have engineers or consultants within your organization who need additional skills and product training to be more effective in their roles. But you probably can't justify sending them to a class for a week, leaving your critical systems unprotected or losing those billable hours. What if one comprehensive training solution could provide your team with critical Cisco classroom training, but would cost you a fraction of the usual expense, risk, and productivity lost?

Live Learning All Access is the answer.

This comprehensive IT training solution includes ALL of SkillSoft's Expert Live and Expert Encore classes mapped to Cisco, Microsoft, CompTIA, and other IT certification programs. Plus it includes the PMI Project Management certification and continuing education classes designed to get and keep your consultants and engineers project management certified.

Why All Access?

All Access provides 24x7 access to all included classes and learning enrichments for up to 12 months, unlimited attendance in any or all of the scheduled class sessions, plus any class updates released during the contract term. Classes in the All Access package include:

- **Team Teaching Approach** – students learn from not one, but two highly-qualified experts during conveniently scheduled class times.
- **Flexible Access to Experts** – if students miss a class, want to review, or are looking for a head start, Encore recorded classes are available 24x7
- **Learning Resources** – printable, searchable classroom materials and online instructor class notes.
- **Hands-on Lab Simulations** – students are challenged with engaging exercises for perfect practice in a simulated environment.
- **Mentoring** – access to qualified, expert mentors via chat and email for clarification and a deeper dive into the subject.
- **Value** – for the price of two or three traditional instructor-led training classes, students gain entry into a world of expert instructors, valuable resources, and on-demand learning.
