Live Learning CCNA-Security Training Program

SkillSoft's Live Learning training programs provide expert-led, practical training for experienced IT professionals responsible for installation, troubleshooting, and monitoring of network devices to maintain integrity, confidentiality, and availability of data and devices, and will ensure competency in the technologies that Cisco uses in its security structure.

The CCNA-Security program is designed and team-taught by our Cisco professional and CCIE-level instructors with more than 40 years of real-world experience, ensuring learners are prepared for their jobs, in addition to being ready to pass their exams.

Recommended CCNA-Security Learning Path

1) Recommended Prerequisites:

Current CCNA Certification (ICND1 and ICND2)

2) Expert Live Course:

Implementing Cisco IOS Network Security (IINS) 1.0

3) IINS Exam:

640-553 IINS

CCNA-Security Certified

Next Steps

The CCNA-Security certification is a major step in obtaining the CCSP certification and in understanding how to develop a security infrastructure, to recognize vulnerabilities in networks, and to detect potential security threats. By purchasing a Live Learning All Access solution, you can ensure that your skills stay current and you have the tools you need to take the next steps in your Cisco career.

Why Live Learning?

All Access Live Learning classes provide unlimited attendance in any or all of the scheduled class sessions, on-demand access to all learning enrichments, plus any Cisco class updates released during the 12-month term. Live Learning classes include:

- **Team Teaching Approach** – students learn from not one, but two highly-qualified experts during conveniently scheduled class times.
- **Flexible Access to Experts** – if students miss a class, want to review, or are looking for a head start, Encore recorded classes are available anytime, anywhere.
- **Learning Resources** – printable, searchable classroom materials and online instructor class notes.
- **Hands-on Lab Simulations** – students are challenged with engaging exercises for perfect practice in a simulated network environment.
- **Mentoring** – access to qualified, expert mentors via chat and email for clarification and a deeper dive into the subject.
