

# Skillsoft® Academy 5i™

Intuitive, cloud-based compliance training management

**Skillsoft Academy 5i is a proven, industry-leading Learning Management System (LMS) built from the ground up to support critical compliance functionality. With Academy, organizations can easily monitor and adjust training initiatives in real time to align with changing regulations, evolving risks and emerging best practices.**

## USER-CENTRIC DESIGN

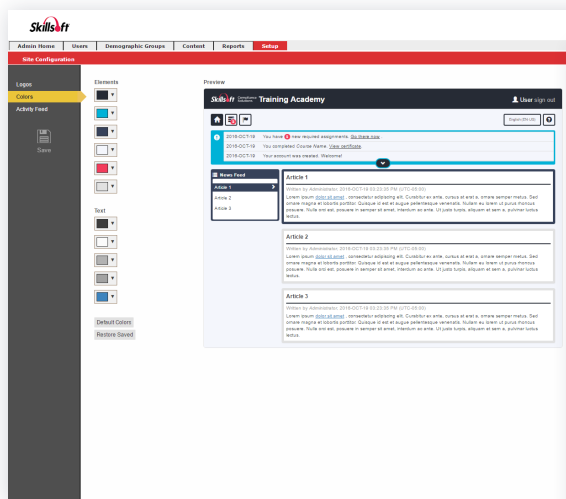

A personalized activity feed shows users recent activity affecting the status of their training assignments, including new assignments, recent course launches and prior completions. Users can monitor their training progress against deadlines, revisit completed courses for review purposes and print certificates.

## FLEXIBLE ASSIGNMENT AND MANAGEMENT

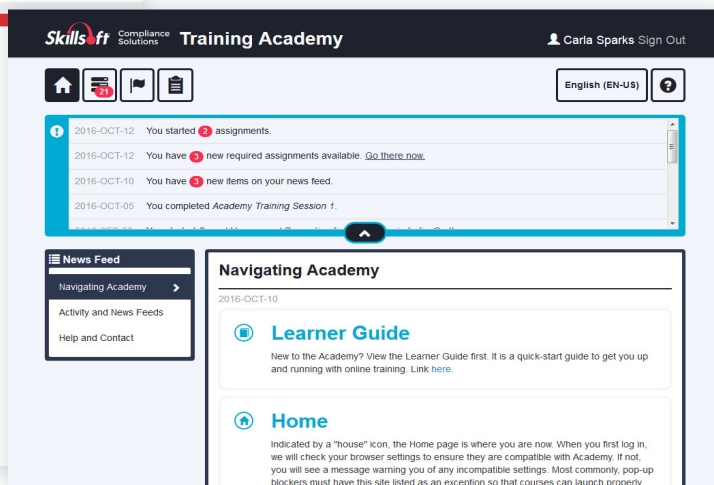

Facilitate the assignment of online and offline training events with one-time-only or recurring options. Assignments can be set to recur by last completion date or due date, with intervals determined by the administrator. Through a configurable news feed, organizations can push out important communications that help users stay current on key compliance initiatives.

“ I have 100% confidence that the team behind the scenes can execute a project to the end. Whenever I ask for something, they say ‘we will handle that’...I come back and it’s done.”

**Petrie Terblanche,**  
**Brocade Director of Internal Audit and Compliance**

Administrators easily customize with the company logo and colors

Instant access to assignments, progress and current happenings

## POWERFUL TRACKING AND IN-DEPTH REPORTING

Provides comprehensive filtering and data export options to support most compliance reporting needs. Administrators may run reports for multiple groups or individual employees for an instant view of status and training progress. Administrators can also create and save customized reports and configure e-mails to run automatically at defined intervals, with training results sent to line managers or supervisors to help drive training completions.

## TRAINING GROUPS

Assign training to individual users or defined user groups. Administrators create user groups based on demographics such as job role, corporate division or geographic location.

## RECORDS MANAGEMENT

Tracks users' access to and completion of assigned courses, while maintaining a complete training history for each user over time. Users and administrators can access a comprehensive view of an individual's training history, including recurring assignments. Academy can share data with most HRISs, including those provided by Oracle-PeopleSoft, SAP and Sentient, allowing seamless integration between Academy and the HRIS.

## FEATURES

Tracks training across all formats: eLearning, classroom, on-the-job and other offline training events.

Provides user access to training resources on desktops or tablets.

Offers customizable security levels, allowing supervisors, managers and training administrators access to the features they need.

Serves up quick views of training program status via customizable dashboard reports.

Allows for centralized management of training records by integrating with an organization's existing Human Resource Information System (HRIS).

## BENEFITS

Keeps users, supervisors and administrators informed of training initiatives via configurable e-mail notifications.

Helps organizations ensure compliance by facilitating the assignment of specific training events according to administrator-defined user groups.

Allows immediate review of training status through standard and customizable reports.

Supports the compliance needs of organizations of any size with powerful technology and simple, straightforward interfaces for users and administrators.
