

Skillsoft® Project Management Solution

Coverage of PMI®'s guides and standards

Skillsoft offers solutions that will prepare individuals for three Project Management Institute (PMI®) globally recognized certifications: Project Management Professional (PMP®), Certified Associate of Project Management (CAPM®) and Agile Certified Practitioner (PMI-ACP®).

A RECOGNIZED PROVIDER OF PROJECT MANAGEMENT DEVELOPMENT

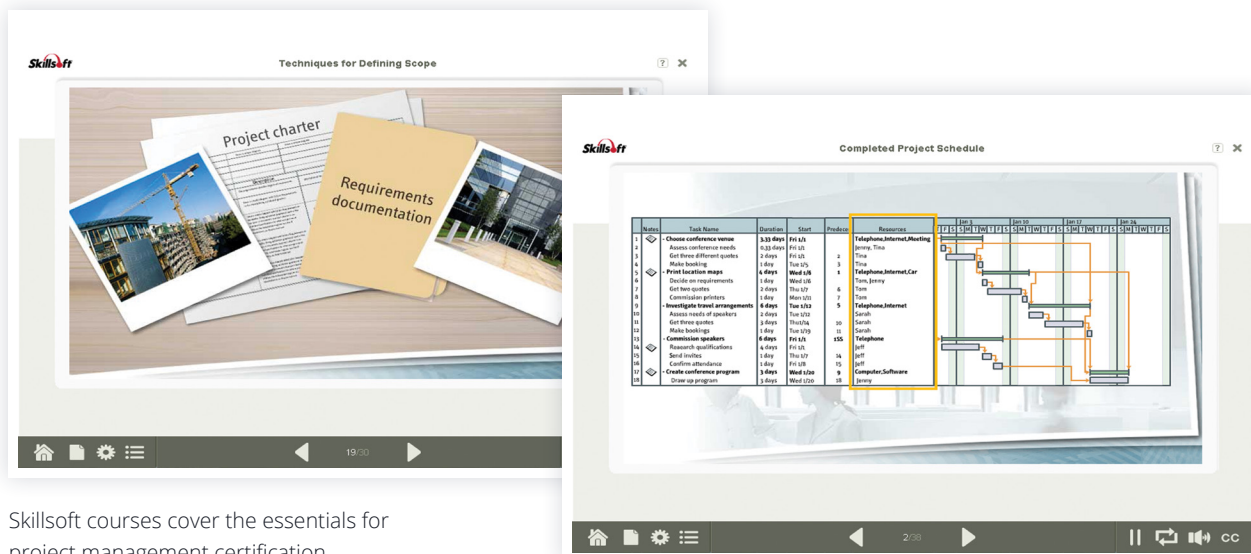

As a PMI Charter Global Registered Education Provider (#1008), Skillsoft provides project management elearning and virtual instructor-led courses that assist PMI members and other project management stakeholders in their on-going professional development.

EARNING AND MAINTAINING CERTIFICATIONS

Whether working toward certification or seeking to maintain credentials, Skillsoft courses help project managers meet certification requirements. Each of Skillsoft's PMBOK® Guide – Fifth Edition-aligned courses are available for contact hour credit, a prerequisite to take certification exams.

“ Skillsoft content allowed our managers to build their skills on their own time and prepared them for the certification exam at a much lower cost. ”

Virginia Clark, Co-founder,
The Distinct Edge Group
Former CLO, SAP and Unisys

Skillsoft courses cover the essentials for project management certification.

To help learners maintain certification, Skillsoft offers hundreds of courses that are pre-approved for Professional Development Unit (PDU) credits under Skillsoft's R.E.P. program. PMPs must earn 60 PDUs every three years and PMI-ACPs must earn 30 PDUs every three years.

PMI'S PMBOK® GUIDE - FIFTH EDITION ALIGNED

Skillsoft has a long history of working with PMI to develop a high-quality courseware curriculum that has been aligned with each version of the PMBOK® Guide. These new Fifth Edition standards reflect the continuing evolution of project management knowledge and practices. In addition to its virtual classroom and elearning courseware offering, Skillsoft also offers additional support for exam candidates via its mentoring services and TestPrep tools that help learners assess their readiness for the PMP and CAPM exams.

PMP® CREDENTIAL

The Project Management Professional (PMP®) certification objectively assesses and measures experience, education and professional knowledge—the foundation of practice as a project manager. Achievement of the PMP credential serves as the basis from which professionals can competently practice as a project manager, leading and directing project tasks.

CAPM® CREDENTIAL

The Certified Associate in Project Management (CAPM) credential is designed for professionals who provide specialized skills to a project team, for aspiring project managers and for graduate and undergraduate students who are studying project management.

PMI-ACP® CREDENTIAL

The Agile Certified Practitioner (PMI-ACP) credential is designed for practitioners who utilize Agile PMDS approaches to project management. Obtaining this credential demonstrates a level of professionalism in agile practices of project management and increases professional versatility in both Waterfall and agile techniques.

PMP, CAPM and PMI-ACP are marks of the Project Management Institute, Inc.

FEATURES

PMBOK and on-demand resources with Skillsoft® Books24x7®.

Skillsoft Live Learning™ brings world-class technical experts right to your computer for preparation.

Hands-on learning helps build skills and reduce knowledge gaps.
