

“ The success of the programme in contributing to a more engaged, more productive workforce and has encouraged us to maintain our focus on investing in people. ”

Kirsty Brooks, Head of Talent, Johnson Controls

BUSINESS CHALLENGE

Operating from 500 branch offices in more than 150 countries, Johnson Controls' Building Efficiency division is dedicated to boosting energy efficiency and lowering building operational costs for more than one million customers worldwide.

As a customer-focused business that continually looks to innovate and enhance its products, services and solutions, Johnson Controls views its employees as integral to its success and is committed to ensuring developing its people.

The UK leadership team initiated a groundbreaking programme to support employees in developing workforce skills and leadership capabilities to boost business performance and better serve customers. The team also wanted to build a strong leadership pipeline for the future.

HOW SKILLSOFT® HELPED

To give managers and staff streamlined access to the learning and career development resources they need, Johnson together with Skillssoft, launched the online My Job Hub – Building Your Knowledge portal. This gave employees access to an extensive Skillssoft eLearning catalogue and opportunities to blend more formal mentoring and on the job support into their learning journey. Now users cannot only request and register for classes and launch web-based training modules, they can also track their own learning history.

Skillssoft also developed and mapped relevant eLearning modules to each role within the career path module. This was then extended to support additional learning programmes – such as aspiring roles, talent management programmes and customer satisfaction programmes.

KEY METRICS

In just 12 months, employee engagement rates escalated to **91%** while leader effectiveness jumped to **74%**

Customer satisfaction ratings jumped by **13%**

The 'Building Your Knowledge' section is now the second most visited page on the JC-icconnect communications platform after the home page, and **91%** of UK employees are active users

97% of employees identified as top talent have been successfully retained in the business
